

## *Next-Gen Resilience Modeling*

[www.in-core.org](http://www.in-core.org)

We invite you to visit the Project IN-CORE booth at the upcoming ASCE INSPIRE conference taking place at the Hyatt Regency in Arlington, VA, November 16 – 18, 2023.

Project IN-CORE, located at Booth 217, will provide a demonstration on how to offer communities support in using IN-CORE to enhance resilience planning. Project IN-CORE aims to increase community engagement and continue developments in the IN-CORE modeling platform. Many of the same researchers and staff will continue developing capabilities of the IN-CORE modeling platform and hope to engage other researchers across various disciplines to contribute as well. Visit [www.in-core.org](http://www.in-core.org) to learn more.

Please stop by to help yourself to a logo cup (limited quantities while they last) as well as engage in an opportunity to sign up for a **free** IN-CORE account and receive a free shirt. Compliments of Project IN-CORE and Colorado State University.

We hope to see you there!

Project IN-CORE team
