

Kim is a PhD candidate in the department of Economics at Colorado State University. He was born in Niger (West-Africa) but grew up in Benin where he is originally from. He earns a Bachelor degree in Statistics at the National School of Statistics and Applied Economics in Senegal, before joining the National Institute of Statistics in Benin, where he served as the senior analyst of short-term evaluation of economic trends in the industrial sector. During his time at the Institute Kim contributed to the conception of the fourth Population Census of Benin as a leading supervisor and released numerous publications on the domestic productive sector. He joined the Colorado State University as a Fulbright scholar in 2012 and was awarded the LS Fan Scholarship in 2014. His research lies within the fields of international trade and public economics through the use of various Econometrics and general equilibrium tools. Outside of Economics, Kim is a great passionate of soccer, music, reading and loves hanging out with friends.
